DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 38-43 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The specification does not describe an first encoder for encoding a first digital information and output parallel data of L bits and first converting for converting into parallel data of L bits into the first parallel data of N bits and an error correcting unit for adding the error correcting coded into the first parallel data as being recited in claims 38- 43. It is noted that the specification teaches only the MUSE signal is processed into parallel data . See Fig. 12.
